

Tingo María, May 6, 2026

Dear:

Dr. Jurek Kirakowski

SUBJECT: Request for SUMI Academic Use -
Software Quality Course - UNAS Peru

I am writing to introduce myself as a Professor at the Faculty of Computer Science and Systems Engineering (FIIS) of the Universidad Nacional Agraria de la Selva (UNAS) in Tingo María, Peru. I am currently in charge of the courses: Software Product Quality, Software Construction II, and Research Design.

The purpose of this email is to formally request permission to use the SUMI inventory for practical class exercises with exclusively educational purposes. Following your recommendations for large classes, I have divided my students into small groups and assigned each a practical project to evaluate software usability.

In my capacity as their professor, I certify that the use of SUMI is solely for academic research purposes as part of my students' professional training. I guarantee that the students are not involved in any commercial consultancy relationships, and I will personally supervise all necessary steps to protect SUMI's intellectual property and copyrights.

Below is the list of students designated as Team Leaders:

Kristel Falcón (kristel.falcon@unas.edu.pe)

Elia Gonzales (elia.gonzales@unas.edu.pe)

Maria Tauma (maria.tauma@unas.edu.pe)

(Note: I have attached a copy of this document on our institution's official letterhead to serve as the formal supervisor's letter).

Thank you in advance for your attention and for providing this valuable learning experience to my students. I remain at your disposal should you require any additional information.

Sincerely,

Ronald Eduardo Ibarra Zapata
Professor, Faculty of Computer Science and Systems Engineering (FIIS) - UNAS
